## Cardiff Oncology to Present at the LifeSci Partners Precision Oncology Day

**SAN DIEGO (February 16, 2021) – Cardiff Oncology, Inc. (Nasdaq: CRDF)**, a clinical-stage biotechnology company developing a drug to treat cancers with the greatest medical need for new treatment options, including KRAS-mutated colorectal cancer, pancreatic cancer, castrate-resistant prostate cancer and leukemias, today announced that Dr. Mark Erlander, chief executive officer of Cardiff Oncology will present at the upcoming LifeSci Partners Precision Oncology Day on February 17, 2021. The Company will also participate in one-on-one meetings.

Details on the presentation can be found below.

Date: Wednesday, February 17, 2021  
Time: 1:30 PM ET  
Format: Corporate Presentation

A replay of the presentation will be available by visiting the “Events” section of the Cardiff Oncology website after the conclusion of the presentation and will be archived on the Company website for 90 days.

### About Cardiff Oncology, Inc.

Cardiff Oncology is a clinical-stage biotechnology company with the singular mission of developing new treatment options for cancer patients in indications with the greatest medical need. Our goal is to overcome resistance, improve response to treatment and increase overall survival. We are developing onvansertib, a first-in-class, third-generation Polo-like Kinase 1 (PLK1) inhibitor, in combination with standard-of-care chemotherapy and targeted therapeutics. Our clinical development programs incorporate tumor genomics and biomarker technology to enable assessment of patient response to treatment. We have three clinical programs that have demonstrated the safety and efficacy of onvansertib: a Phase 1b/2 study of onvansertib in combination with FOLFIRI/Avastin® (bevacizumab) in KRAS-mutated metastatic colorectal cancer (mCRC); a Phase 2 study of onvansertib in combination with Zytiga® (abiraterone)/prednisone in metastatic castration-resistant prostate cancer (mCRPC); and a Phase 2 study of onvansertib in combination with decitabine in relapsed or refractory acute myeloid leukemia (AML). A new Phase 2 trial of onvansertib in combination with nanoliposomal irinotecan, leucovorin and fluorouracil for the second-line treatment of patients with metastatic pancreatic ductal adenocarcinoma (PDAC) is planned for initiation in the first half of 2021.
